“Fight with Fletcher”

**June 20, 2026 – A Concert for Fletcher Fox in Huntingdon Valley, PA
Supporting Neurodiversity & The Fight Against Cancer and Childhood Trauma**

In his life of 27 years, Fletcher Fox has overcome huge obstacles including an autism diagnosis that was weaponized against him during a difficult custody battle. This diagnosis was exploited in order to justify years of unnecessary residence at institutional facilities notorious for their unconscionable treatment of children. Fletcher’s 15 year old voice, [“Free Fletcher Fox” -YouTube](#) was key to sparking an investigation which blew up in the press, bringing attention to this rampant abuse and neglect. This resulted in a legislative hearing in Massachusetts aimed at preventing other children from enduring such trauma.

Fletcher is now facing his biggest challenge yet. A stage 4 colon cancer diagnosis in August of 2025 has once again ignited his grit and determination. The [“Adverse Childhood Experience”](#) study found that children who have 4 or more adverse childhood experiences have much higher rates of disease, including cancer, as adults. Fletcher is committed to informing the world that children are not always resilient. They carry trauma in their brains, bones, and immune systems as they develop. He is making sure the world knows that you can’t rationalize harming children under the assumption that they will just get over it. Fletcher is committed to using his voice to protect countless children and promote systemic change.

Stage Trip is honored to be producing this amazing event in conjunction with **Circle D. Concerts. Our Mission is to keep Fletcher’s voice alive.** The fallout from the trauma of divorce and custody battles caused severe hardship, and the abusive institutionalization resulted in a complex PTSD diagnosis. This gravely harmed Fletcher’s development, resulting in serious health and financial struggles. Fletcher’s cancer treatment includes very expensive metabolic IV therapy infusions and targeted holistic drug treatments based on research by renowned cancer specialists. Research shows that these therapies are highly effective. The proceeds from this concert could likely save his life while bringing nationwide attention to these vital issues

*Check out this amazing Substack article by MartyG Reports, about Fletcher’s cause, including a special report by Anonymous and Fletcher’s most recent video, “Trauma doesn’t disappear when childhood ends”.
